With an exclusive [cave raclette](#) you will experience an almost ordinary raclette meal in an extraordinary ambience. The cave evokes different feelings in people: fascination, security, experiencing something new and possibly also feelings of insecurity.

The company [InCave GmbH](#) as a cave specialist wants to inspire as many people as possible for caves and therefore offers the cave raclette at the Stockhorn in

an easily accessible and walkable cave, so that you as a cave novice are not deterred.

For the hike to and in the caves, surefootedness and a head for heights are required. The route leads partly on official hiking trails, partly through pathless terrain. The pure hiking time is about 2 h. Since clothes can get dirty, it is advisable to wear old clothes.
