

Unforgettable group experiences

The Stockhorn is an ideal excursion destination for a half- or whole-day excursion for clubs, associations, schools and companies. A wide range of outdoor team activities and experiences like hiking, rock climbing and fishing are on offer to groups. The geology and "Habitat on the Stockhorn" adventure trail are both interesting and fascinating for groups of school pupils.

There are suitable activities for every type of excursion. The Stockhorn region leaves no wishes unfulfilled and offers many kinds of group experiences and perfect programmes of supporting activities for your half- or whole-day excursion.

A culinary treat for lunch or dinner in the modern Stockhorn Panorama Restaurant at 2139 metres a.s.l. or in our rustic Restaurant Chrindi at the middle station at 1637 metres a.s.l. will serve to round off a pleasant day spent together as a group.

Geology and "Habitat on the Stockhorn" adventure trail

The geology and well as the habitats on the Stockhorn are of great interest and very instructive for groups of school pupils.

The rock gallery leading to the [panoramic platform](#) contains information panels that explain the formation of the Stockhorn and the nature of the rocks found here. The view from the platform provides a magnificent unimpaired view of Thun, Lake Thun, the Aare and Gürbe valley, the Swiss

central plateau through to the Jura and, on clear days, right to the southern Black Forest.

Various information panels positioned along the adventure trail serve to explain in an entertaining manner the interrelationships between man and nature in changing habitats.

Various guides covering the geology of the Stockhorn, the "Habitat on the Stockhorn" adventure

trail as well as the flora on the Stockhorn are also available.

Cableway tour

The option of an approx. 45-minute plant tour of the cableway at the Chrindi middle station exists for groups with a respective technical interest. We kindly ask interested parties to book in advance.
